Ms. Hsu,

Inteliquent respectfully requests eight (5) international signaling point codes for use on our signaling network. Neutral Tandem (dba Inteliquent) is a current holder of a 214 license, file number 10-1011. The need for the new ISPC by Inteliquent is driven by the launch of a new inter-carrier SMS / MMS message hub service. The signaling service provided is GSM MAP. The equipment requiring ISPCs are two Tekelec Eagle STPs (one in Atlanta, GA and one in Chicago, IL) and three Openmind Networks SMS Hub SCPs (two in Atlanta, GA and one in Chicago, IL). A network diagram is set forth below:

Please contact me if additional information is needed to complete this request.

Sincerely,

Carl Drueckhammer
Director – Message Services
